

# INMEDEA SIMULATOR

## - Quick Guide -

## REGISTRATION

### 1. Open URL: <http://www.inmedea-simulator.net>

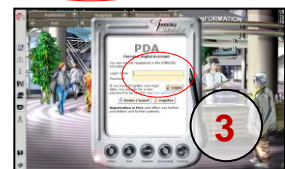

First, click on the **entry**, by doing so you get to the central **help desk**.

### 2. Demo / Registration

In order to be able to use the free contents of INMEDEA Simulator, you first need to register to the system or login as a **guest**. Further contents may be activated by **activation codes**, they are obtainable from e.g. the webshop of DocCheck under <http://load.doccheck.de>.

### 3. Login

As a **guest**, you are automatically logged into the system. If you have registered, you must enter the user name you chose to log in and type the **pass word** which was sent to you into the login form; confirm by pressing the „**Login**“ button.

## NAVIGATION

Via the navigation bar on the left side of the screen, you can at any point jump to another area of the virtual clinic, change your personal data or user settings or e.g. contact INMEDEA:

1. **PDA** (Personal data, registration, entry of activation codes)
2. **Central help desk**
3. **Help desk** (specialty clinic, selection of patient)
4. **Multimedia library** (learning materials)
5. **Auditorium** (learning courses)
6. **Internet Café** (contact, forum, information)
7. **Back to the current patient** (from any scene)
8. **Help** (description of the scene, language setting, clickable elements, user settings, etc.)
9. **Contact** (email to INMEDEA)

## - Quick Guide -

### TREATMENT OF PATIENTS

- To call a patient, go either to the „**Auditorium**“ to join a course or directly to the „**Clinics**“ to select the desired clinic and a patient. Enter the „**Examination room**“.
- You now have access to the **patient list**, from which you can select patients activated for you and treat them. Click on the **patient's name** or the number to the right of the name.
- Examine the patient by performing the **medical history** and the **physical examination**. If necessary, request further examinations (**lab tests, technical diagnostic tests**).
- For establishing the diagnosis, open the **patient file** on the desk and enter under item „**Diagnoses**“ the main, differential and secondary diagnoses. Finish this part of the patient 's treatment by pressing the button „**Resolve**“. A short case summary will be displayed as well as an automatic evaluation in which your solution is compared to that of the expert.
- You can now start the **therapy planning**. Open the therapy drawer, select the corresponding measures and add them to the therapy plan. For finishing the therapy and closing the patient case, click on „**Finish therapy**“. A summary of the recommended therapy for the given case example will be displayed.

1: Medical history, 2: Physical examination, 3: Patient file, 4: Examination requests,  
5: Therapy planning, 6: Navigation bar
