

## Quick step guide for first time users

- With your internet browser (recommended Mozilla Firefox 1.5) open the web page <http://www.inmedea-simulator.net>
- Notice the red question mark (help function for further information) →

- Click on the “Start system” button
- In the next scene click on the entrance

- Inside the entrance hall click on the PDA icon on the navigation board →

- Use the demo mode or register by filling in the registration form. Should you have received an activation code it is mandatory to register. Complete registration with the login button. Within the PDA first click on the button “user” then on “Activation codes”. Fill in the code and activate your corresponding access with the save button.
- Close the PDA and go to the clinics
- Go to the neurology and its “Examination room” by clicking the signs
- From the patient selection menu choose Maria Bright by clicking on the little square 1 at the right side of her name.
- Perform the following steps
  - Medical history
  - Physical examination
  - Examination requirements
  - Review of results and diagnosis setting
  - Therapy

## Step by step through the scenes of the virtual clinic

### Medical history

- Click on the “Medical History” form. From the categories menu you can choose the relevant questions that will be answered by the patient. Once you have asked all relevant questions, proceed to “Physical examination” clicking on the respective sign on the desk.

### Physical examination

- Put the patient in the appropriate position by clicking on the respective chart in the right upper corner of the scene. →

- Choose an examination tool from the table by clicking on it. With the cursor you move the tool over the patient’s body. When the cursor form changes to a hand, you can click on the region you want to examine.
- After finishing the relevant examination, go back to the desk by clicking on the yellow desk sign.

### Examination requirements

- For selection of apparative diagnostics click on the “Examination requirements” drawer.
- Confirm the appropriate examination by clicking on a category first to select the examination from the menu list.
- Send the patient to an examination by filling in the form and a click on the request button.
- When you have finished this section return to the desk with a click on the sign “Desk”

### Review of results and diagnosis setting

- Click on patient file (blue file on the desk) →
- Review the results
- Open the “Diagnosis” page and click on the “add diagnosis” button
- Enter your diagnosis in the respective field of the pop up window. Choose the ICD10 Code from the list that appears after a click on the search

button.

- Repeat this step if necessary.
- Finalise the diagnosis by clicking on the “Solve” button. A window pops up giving you an assessment of the diagnostic visit.
- Close the file by clicking on the “close” button.

### Therapy

- Click on the drawer “therapy plan”
- Select the appropriate therapy by clicking on a category first and then select the therapy from the menu list. Fill in the therapy plan and save changes. Repeat this step until you have ordered all necessary therapies. Finalise the therapy section by clicking the “Finalise therapy” button in the therapy plan. A pop up window with an assessment of the therapy visit occurs.
- After having closed the case you can see the therapy recommended by the author and compare it with your own decisions.

Meet your patient and treat her well!
